

FOR IMMEDIATE RELEASE

SMAART and medQ Selected by Emergency Health Center at Willowbrook

Integrated RIS/PACS provides single workflow process

Dallas, Texas – August 25, 2007: Healthcare system providers SMAART Medical Systems, Inc. and medQ, Inc. have been selected by Emergency Health Centre at Willowbrook (EHCW) near Houston, Texas to provide their integrated SMAART™ PACS - Q/ris 3000™ Workflow Management System™ solution to support EHCW's emergency care operations. EHCW is the nation's first concierge emergency medicine facility, providing patients with superb emergency medical care in a comfortable and luxurious environment unlike any other emergency room.

Deployment of the Q/ris 3000™ - SMAART PACS integrated radiology management system will enable EHCW to create a complete and very responsive imaging system to support the stringent requirements of their special brand of urgent care. This integrated RIS/PACS approach creates a single workflow process resulting in improved operational and clinical productivity and the significantly reduced report turnaround interval required for emergency treatment.

The integrated RIS/PACS system for EHCW pairs the latest web and server technology with the latest imaging systems for the most up-to-date overall system architecture. The system provides fast access to all EHCW's radiology exams, including 64-slice CT, digitized x-ray, and color ultrasound.

medQ, inc. and SMAART Medical Systems, Inc. are both headquartered in Dallas, Texas, and provide PACS and radiology information technology systems and service that enables healthcare providers to deliver quality, responsive, cost effective patient care. Their integrated RIS/PACS solutions provide an end-to-end, patient centric diagnostic imaging management process that result in greater operational efficiencies, improved patient outcomes with overall bottom line improvements.

For more information contact either Scott Rogers from SMAART at www.smaart.net or 972-248-0020 or John Norman of medQ at medq.info@medq.com or 1-800-597-6330.
